Objective

I am now seeking a full time position running a vessel of 30mtrs, or over, based in the Western Mediterranean. I am also open to Project Management, Guardianage or Relief positions in the short term.

Overview

My professional career now spans over 22 years, during which time I spent 10 years working with my wife and have run yachts of between 80 – 195 ft primarily as a Captain and Stewardess/Deck team. During the last three years we have been living in our house in Scotland, where I have been running charter yachts on the west coast. However, the Scottish winters are too harsh and we have decided to move back to the warmth!

I have cruised extensively from the Arctic to the Mediterranean and the West Indies to the Eastern Seaboard of the States, starting with a sailing background from a young age before moving onto power boats.

I have a strong mechanical, electrical, IT, networking and electronics background and have been involved in managing various refits, including bringing vessels into class for the first time, and creating / implementing mini ISM's.

Over 5 years I worked for the same owner running both his 41mtr motor yacht, Rob Roy and his 41mtr sailing yacht Innocean, until both were sold. The work on Rob Roy involved, full commissioning and improvement of all systems on board, managing the marketing / brokerage process and various trips throughout the Mediterranean, whilst on Innocean we completed various owner trips and returned her to Lloyds class and presented her at various boat shows until sold.

Since then I have then been running three different charter yachts on the west coast of Scotland, and also been doing quite a lot of marine electronics / electrical work.

If you have any questions or would just like to have a chat, please don't hesitate to call or email, I look forward to speaking with you soon.

All the best

Qualifications
